(609) 674-6029

education

Rutgers, The State University of New Jersey

B.S. Computer Science | 2018

Dean's List | Spring 2015

projects

Wunderapp - Created a non-responsive, single-page app that is based on a Wunderapp redesign, and was built using HTML, CSS, and vanilla Javascript.

IMDb - A responsive, single-page app that was inspired by an IMDb redesign, and built using HTML, CSS, Bootstrap, and Hyperapp.

Dynamic HTML Table - Built using HTML, SASS, and vanilla Javascript. An array of objects is looped over to dynamically generate an HTML table and populate cells with data. Conditional statements are used to apply CSS classes to table rows based on certain property values of the current object.

Whatcha Lookin' App - Created an Android app in Java, that was integrated with Google Firebase Cloud Messaging and implemented both Card and RecyclerView. This was senior project for the information security firm, Castle Ventures.

Online Quiz - Developed the front-end of an MVC based online quiz system using HTML, CSS, and PHP cURL.
